DID YOU KNOW?

COMAND[®] promotes soil health by enhancing mineral & nutrient uptake, while reducing water inputs & providing your lawn with the beneficial biology it desperately needs.

DIRECTIONS FOR USE

as a **TOPDRESSING:**

Broadcast **COMAND[®]** evenly at a maximum depth of 1/4 inch of material. Water immediately after application.

as a **SPOT TREATMENT:**

For bare spots and weak turf areas, use a tine fork or spiking tool to poke holes and aerate the soil. Broadcast **COMAND[®]** and work into holes and cover soil surface. Water thoroughly.

for **TURF ESTABLISHMENT:**

Prior to laying new sod, **COMAND[®]** can be uniformly broadcast over the whole area. Apply at an average depth of 1/2 inch and then use a rake to incorporate into the surface of the soil. The amended area should be watered thoroughly after seeding, sodding or planting.

Always seed, plant or sod during the recommended period in your USDA Plant Hardiness Zone.

COMAND[®] is a registered trademark of Harvest Quest International, Inc., and **COMAND[®]** products are marketed and sold by **A1 ORGANICS LLC** under license.
