

# CERTIFIED

This compost product has been sampled and tested as required by the Seal of Testing Assurance Program of the United States Composting Council (USCC). Test results are available upon request by calling A1 Organics at 1.800.776.1644.

## CERTIFIED COMPOST THROUGH THE SEAL OF TESTING ASSURANCE (STA) PROGRAM

- Provides independent monitoring of compost quality.
- Was developed through funds provided by the US Environmental Protection Agency (EPA).
- Is supported by the US Department of Agriculture.
- It's the only national certification program for commercially manufactured compost.

## A1 ORGANICS

Gold Leader with the Colorado Environmental Leadership Program

Gold Leaders are those companies with a fully operational, facility-specific Environmental Management System (EMS). They must meet beyond-compliance requirements and have no serious violations in three years.

### BIOCOMP® CERTIFIED COMPOST

**Class I Compost** with a proven track record of performance. Produced utilizing a combination of several feed stocks, including brewery residuals, clean food waste, various types of ground wood & biosolids. Restores microbiology in soil for healthy plant growth.

BioComp™ is the compost of choice.

### ECOGRO® CERTIFIED COMPOST

**Class I Compost** produced using feed stocks of primarily ground tree and limb, leaves, grass, source separated food, and brewery residuals. Naturally contains essential micro and macro nutrients, and is low in salts. Screened to a 1/2" minus.

### COMAND®

COMAND® is a bio engineered, yet completely natural product designed as a one-of-kind specialty top dressing. COMAND® is produced using a proprietary blend of enzyme producing microbes. Utilizing unique composting methodology and innovative techniques, micro organisms are maximized for soil and turf health. A1 Organics offers COMAND® as the next generation product in turf management.

### PREMIUM 3 CONTRACTOR

**Class II Compost** High nutrient product best suited for large scale commercial and agricultural applications. Contains significant amounts of stabilized organic matter produced from rich dairy manure and bedding materials.

### PROXIMO® PROFESSIONAL GROWING MEDIA

#### Professional Grade Growing Media

Probiotic regiment represents cutting edge breakthroughs in soil microbial management, tested 4x more potent than worm castings at sustaining soil life. These unique materials stimulate hydrosynthesis and sugar production in the soil for robust microflora colonization and balance PH fluctuations, mitigate disease, increase yield and reduce plant stress. Natural nitrogen fixation lowers the need for ongoing fertilization reducing cost and groundwater pollution. Over 30 organic acids and amino acids to feed all soil life. Microbial inoculation including beneficial mycorrhizal fungi, beneficial algae, cutting edge archaea and much more.

### AMENDED PLUS+

Blended with 50% Class I compost. Same great benefits as our amended topsoil with a increased nutrient value and contains populations of beneficial soil microorganisms. Ideal starting base for for planting in pots and raised gardens.

### AMENDED TOPSOIL

Screened topsoil blended with 20-30% class I compost. Great all-purpose soil providing a uniform mixture when onsite blending/compost application is not practical. Excellent for pre-sod/seeding and similar applications.

### SCREENED TOPSOIL

Blended soils screened less than a 1/2" to create a native, general purpose, topsoil product.

### 2ND CHANCE MULCH™

A recycled mulch produced from limb, log and clean lumber. Natural or naturally-dyed choices available.

- Brown
- Coffee Brown
- Red
- Gold

### CUSTOM BLENDS

#### Custom Blends

- Bioretention
- Erosion Control
- Sediment Control
- Biofilter Media
- Roof Top

#### Applications

Trees & Shrubs

Lawn, Turf

Flowers, Vegetables, Gardens

Additional information and application instructions can be found at [www.a1organics.com](http://www.a1organics.com)

According to the USDA, a 1% increase in soil organic matter can add 27,000 gallons per acre of water retention.
